What's inside

Ideas, captions, Canva designs, photos and results usually live in five different places. The SMM Dashboard puts them on one Notion page, with a simple weekly routine to run it.

Content Calendar

Every post with its hook, slide copy, captions, hashtags, CTA, Canva links and graphics. Status board, calendar and table views.

Graphics previews

See every IG/FB and TikTok graphic at a glance in two gallery views, right on the dashboard.

Events & content needed

Upcoming key dates, plus a shot list of photos, Reels and B-roll you need to make.

Brand Hub & Pillars

Positioning, audience, voice, colors, fonts and Canva links, plus 5 content pillars with target %.

Hook & Caption Bank

15 hook formulas, caption structure and template, CTA bank, hashtag sets and a platform size cheat sheet.

Track & improve

Monthly performance tracker, 5 review questions, benchmarks, repurposing workflow and a QA checklist.

How it fits together

Brand Hub

keeps every post on-brand

Hook & Caption Bank

speeds up writing

Upcoming events

tells you what to plan for

Idea Parking Lot

Dump every raw idea

Calendar

Date it, write it, design it

QA

Run the checklist

Publish

Schedule and go live

Monthly review

Keep what works

↻ What you learn in the monthly review becomes next month's ideas.

Before you start: you need a free Notion account. Everything in this template works on Notion's free plan, on desktop, web and mobile.

Get the template into your Notion

You'll make your own private copy. Nobody else, including us, can see what you put in it.

1 Log in to Notion

Open notion.com on desktop or web and sign in (or create a free account).

2 Open your template link

Click the template link in your purchase email. The template opens as a page in your browser.

3 Click "Duplicate"

It's in the top-right corner of the page. If you're asked to pick a workspace, choose the one you want to work in.

4 Find it in your sidebar

The template appears under *Private* in your left sidebar as ✨ **SMM Dashboard**. Right-click it and choose **Add to Favorites** so it's always one click away.

5 Open the "How to use this dashboard" toggle

It's in the grey box at the top of the page and has the setup checklist from the next page.

Managing social for clients? Duplicate the template once per client. Each copy is completely separate, so data never mixes and you can share a client's copy with them without exposing anyone else's.

Getting around the dashboard

SECTION	WHAT IT'S FOR
Top box	Short intro and the "How to use this dashboard" setup guide
Left column	Upcoming events, then IG/FB and TikTok graphics previews
Right column	Content needed (your shot list), the Content Calendar and a calendar view
Marketing Tools	Your tool gallery and tech stack with links
Brand & writing	Brand Hub, Content Pillars, hashtags, CTAs, Hook & Caption Bank
Bottom	Repurposing workflow, QA checklist, monthly tracker, review, Idea Parking Lot

Make it yours

Do this once. After that, you only need the weekly rhythm on page 6.

1 Fill in the Brand Hub

Replace every [bracketed] placeholder: brand name, positioning, story, offer, audience, voice, words to use and avoid, colors (with HEX codes), fonts, Canva folder links, posting schedule and handles.

2 Set your 5 content pillars

The template ships with Educate, Show How, Behind the Scenes, Recommend and Engage. Update the Content Pillars table, then rename the matching options in the Content Calendar: open the calendar, click the **Pillar** column header → **Edit property** → click an option to rename it.

3 Adjust Topic Types and Platforms

Do the same for **Topic Type** (Tips & How-to, Myth vs Fact, Tutorial...) and **Platforms**. It comes with Instagram, Facebook and TikTok; add LinkedIn, YouTube or others if you use them.

4 Add your hashtag sets and CTAs

Open the *Hashtag sets* and *CTA bank* toggles and replace the placeholders with your own.

5 Add upcoming events

List the next 90 days of key dates in the blue *Upcoming events* box. There's a list of ideas inside the toggle.

6 Set up Marketing Tools

Add the tools you use with their links. Add a logo to *Files & media* so it shows on the gallery card.

7 Delete the EXAMPLE posts

The calendar has 8 sample posts marked EXAMPLE so you can see how finished entries look. Open a couple, then select them all and press Delete.

8 Brain-dump ideas

Fill the *Idea Parking Lot* at the bottom with as many ideas as you can. Don't filter. You'll sort them on Monday.

Rename, don't delete. The views use Date, Status, Pillar and the two Graphics fields. Renaming any property is fine; Notion updates the views automatically. Deleting them is what breaks things.

The Content Calendar

One row is one post. Click a post to open it and see every field.

Views

VIEW	USE IT TO
Status board	Your daily home. Posts grouped by status. Drag cards to the next column as work moves.
Calendar	See your month at a glance and spot gaps. Drag a post to a new day to reschedule it.
Default view	A full table of every field, handy for bulk editing
IG/FB Graphics Preview	Gallery of your feed graphics (left column of the dashboard)
TikTok Graphics Preview	Gallery of your TikTok graphics (left column of the dashboard)

Fields

FIELD	WHAT TO PUT THERE
Name	Week, day and working title, e.g. "W1 Tue: 5 mistakes..."
Date · Week	The publish date, and the week number in your monthly plan
Status	Where the post is in the workflow (see next page)
Pillar · Topic Type	Which pillar it serves and what kind of post it is
Content Type · Platforms	Carousel, Single Post or Reel, and where it's going
Hook	The first line or cover text. Pull a formula from the Hook bank.
Slide Copy	Slide-by-slide text, or the Reel script
Caption (IG + FB) · (TikTok)	A full caption for feed, and a short one for TikTok
Hashtags (IG + FB) · (TikTok)	Paste from your hashtag sets
CTA	The one thing you want people to do
Visual Brief	What the graphic should look like, and the photo you need
Canva IG/FB · Canva TikTok	Links to the Canva designs
IG/FB · TikTok Graphics	Upload the exported images. They appear in the preview galleries.
Notes	Anything else: feedback, reminders, results

YOUR ROUTINE

Statuses & weekly rhythm

Every post moves through seven statuses. A few focused blocks a week keep it moving.

Not started

Copy drafted

Designed

Needs photo

Ready to post

Scheduled

Published

Needs photo means the design is done but it's waiting on a photo (for example, a TikTok background). Add the shot to the *Content needed* box so you can take them all in one session.

The weekly rhythm (about 4½ hours a week)

WHEN	WHAT TO DO
Monday · 30 min	Plan. Pick ideas from the Idea Parking Lot. Add them to the calendar as <i>Not started</i> with a date, week, pillar and topic type. Check Upcoming events.
Tuesday · 90 min	Write. Batch hooks, slide copy, captions and CTAs using the Hook & Caption Bank. Move posts to <i>Copy drafted</i> .
Wednesday · 90 min	Design. Make the graphics in Canva, paste the links and upload the exports. Move to <i>Designed</i> , or <i>Needs photo</i> if you're waiting on a shot.
Thursday · 30 min	QA and schedule. Run the Pre-Publish QA Checklist, move to <i>Ready to post</i> , schedule, then move to <i>Scheduled</i> .
Friday · 15 min	Check in. Mark live posts <i>Published</i> and note anything that did well in Notes.
Month end · 30 min	Review. Fill in the Monthly Performance Tracker and answer the five review questions.

Short on time? Merge Tuesday–Thursday into one 3-hour batch day. The status board still works; you'll just move cards further in one sitting.

Writing and designing a post

Open a post and scroll to the Hook & Caption Bank on the dashboard.

Here's the path from blank page to ready-to-post.

1 Pick a hook formula

The *Hook formulas* toggle has 15 fill-in-the-blank hooks. Write 3 versions and keep the best in the *Hook* field.

2 Write the slides or script

Carousels: one idea per slide, 6–10 slides, big text. Reels: hook on screen in the first 2 seconds, then the value, then the CTA. Put it in *Slide Copy*.

3 Write both captions

Use the six-part *Caption structure* (or the copy-paste template) for IG/FB. Then write a one- or two-line version for TikTok.

4 Choose exactly one CTA

Match it to the goal from the CTA bank: shares for reach, saves for value, a comment keyword for leads.

5 Paste the hashtags

Use the core set plus the right topic set. Follow the usage rule in the toggle for each platform.

6 Brief and design

Write a *Visual Brief*, design in Canva using the sizes in the *Platform size cheat sheet*, paste the Canva links and upload the exports to the Graphics fields.

Repurpose your winners

When a post does well, run the **Repurposing Workflow**: one strong idea becomes 3 short videos, 1 carousel, 2 quote graphics, a text post and a story poll. Add each piece to the calendar.

Run QA before anything gets scheduled

The 12-point **Pre-Publish QA Checklist** catches the mistakes that cost reach: a weak hook, two CTAs, missing video captions, an unreadable cover, broken links. Untick the boxes and reuse it for every post.

✦ **Pro tip:** paste your Brand Hub tone of voice and a few of your best captions into your AI writing tool before asking it for drafts. The output will sound much more like you.

Tracking results

Thirty minutes at the end of each month tells you exactly what to make more of.

The Monthly Performance Tracker

On the last working day of the month, open your platform insights (or your scheduler's analytics) and fill in one row: posts, reach, engagement rate, saves, shares, new followers, leads/DMs and your top post. Rename *[Month 1]* to the actual month, and add a row each month.

To work out engagement rate:

$$\begin{aligned}\text{Engagements} &= \text{Likes} + \text{Comments} + \text{Saves} + \text{Shares} \\ \text{Engagement rate (\%)} &= \text{Engagements} \div \text{Reach} \times 100\end{aligned}$$

Write the top post's name in the last column, and add a note to that post in the calendar about why it worked.

The Monthly Review

- 1 **Which post performed best, and what drove it?**
Look at the hook, format and topic. Make more like it.
- 2 **Which pillar underperformed, and why?**
Compare against the % targets in your Content Pillars table.
- 3 **What are comments and DMs asking for?**
Add those questions to the Idea Parking Lot.
- 4 **What will you stop doing, and what's your one experiment?**
Pick one change for next month. Just one.

Benchmarks

METRIC	HEALTHY	GREAT
Engagement rate (by reach)	3–5%	6%+
Saves per 1,000 reach	10–20	30+
Shares per 1,000 reach	5–10	15+
Monthly follower growth	3–5%	10%+

Benchmarks vary by niche and account size. Your own month-over-month trend matters most.

Everything else on the page

Content needed

Your shot list. Note every photo, Reel and B-roll clip you need, then shoot them all in one session. There's a ready-made B-roll list to batch film.

Graphics previews

Two galleries show the images you upload to *IG/FB Graphics* and *TikTok Graphics*. Use them to check your feed looks cohesive before you post.

Marketing Tools

A gallery of the tools you use (Canva, Metricool, Make, Google Drive...) with links, plus a tech stack table. Store which account a tool is under, **never passwords**.

Idea Parking Lot

A checklist at the bottom of the page for raw ideas. No filtering, no formatting. Move the good ones into the calendar every Monday.

Power-user tips

- **Mobile capture:** add the dashboard to Favorites in the Notion app and log ideas in seconds.
- **Hide fields you don't use:** open any post → ••• → *Customize page* and hide empty or unused properties.
- **Post templates:** in the Content Calendar, click the arrow next to *New* → *New template* to save a pre-filled post (e.g. "Tuesday carousel") with your usual hashtags and CTA.
- **Client approvals:** share a client's copy as "Can comment". They comment on the post; you move it on once it's approved.
- **Automate it:** with Make or Zapier you can send a post's caption and graphics to your scheduler when its status changes to *Ready to post*.

FAQ & troubleshooting

Do I need a paid Notion plan?

No. Everything works on the free plan. Notion's free plan has a file-upload size limit, so for big videos paste a Drive or Canva link instead of uploading.

I deleted a view, property or row by accident.

Press Ctrl/Cmd + Z straight away. For deleted pages, check *Trash* in the sidebar. You can also re-duplicate the original template any time from your link.

The graphics previews are empty.

They show images uploaded to the *IG/FB Graphics* and *TikTok Graphics* fields. Upload your exported PNG or JPG files there.

A post isn't showing on the Calendar view.

It needs a Date. Undated posts still appear in the Status board and the table.

A card disappeared from the Status board after I renamed a status.

Rename the existing option rather than creating a new one, and check that empty groups aren't hidden (••• → Group → Show empty groups).

Can I use this for more than one brand or client?

Yes. Duplicate the template once per brand. Your licence covers your own brands and the clients you manage.

Need help? Reply to your purchase email and we'll get back to you within 2 business days.

Licence: for personal use and for managing your own clients' accounts. Please don't resell, share or redistribute the template or this guide.

Now go make something worth saving. ✦
